**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 to 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over 2002/0091200.

Angiolini et al 2002/0091200.

The Angiolini et al reference teaches an optical film, note entire reference. The optical film comprises a polymer. The film is repetitive units a-b. Unit is a polyarylate with one or more different bisphenolfluorene units, note figures. The b unit is a divalent

hydrocarbon group with up to 20 carbon atoms, note figures. The sole difference between the instant claims and the prior art is the specific groups attached to the bisphenolfluorene units. However, it would have been obvious to one of ordinary skill in the art to determine through routine experimentation the optimum, operable specific groups to modify the references and use the attached phenyl groups as the references do teach using different derivatives.

*Response to Applicants' Arguments*

Applicant's arguments filed June 5, 2009 have been fully considered but they are not persuasive.

The 2002/0091200 reference is art under 35 USC 102b and thus the declaration does not overcome the reference.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
